Big Data Engineering With MapReduce and Hive

Data Science Dojo

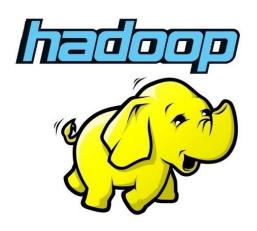

Machine Learning Scaling

Programs	Programming	Cloud	Distributed
• Excel	PythonRSAS	 Azure ML AWS ML Watson Analytics Big ML R Shiny Cloud Virtual Machines 	 Hadoop Spark H20 Revolution R

Agenda

From a Data Scientist's Perspective

Goals:

 Teach you how to leverage an existing Hadoop cluster, self-service data query

Not goals:

 Managing or administering a Hadoop cluster

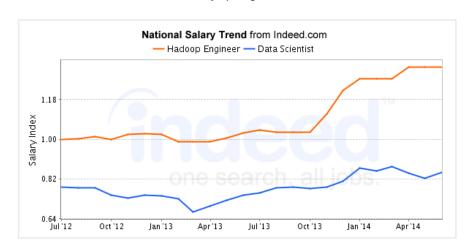

unleash the data scientist in you

Hadoop Engineers

Average Salary of Jobs Matching Your Search

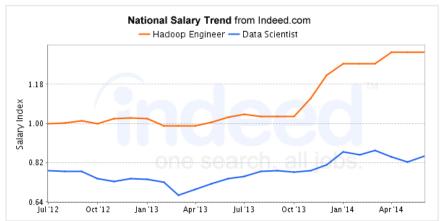

Average Hadoop Engineer salaries for job postings nationwide are 47% higher than average Data Scientist salaries for job postings nationwide.

Average Salary of Jobs Matching Your Search

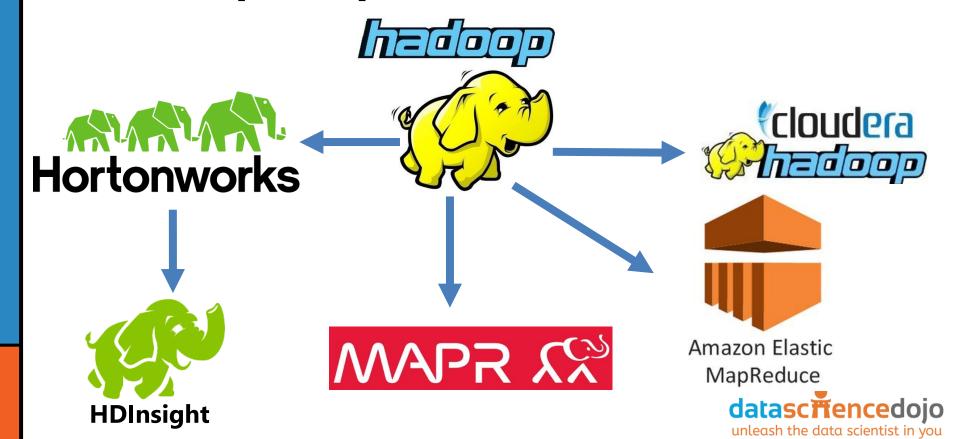

Average Hadoop Engineer salaries for job postings in Redmond, WA are 47% higher than average Data Scientist salaries for job postings in Redmond, WA.

Hadoop Implementations

(Vanilla/Base) Hadoop

Processing engine for distributed batch processing.

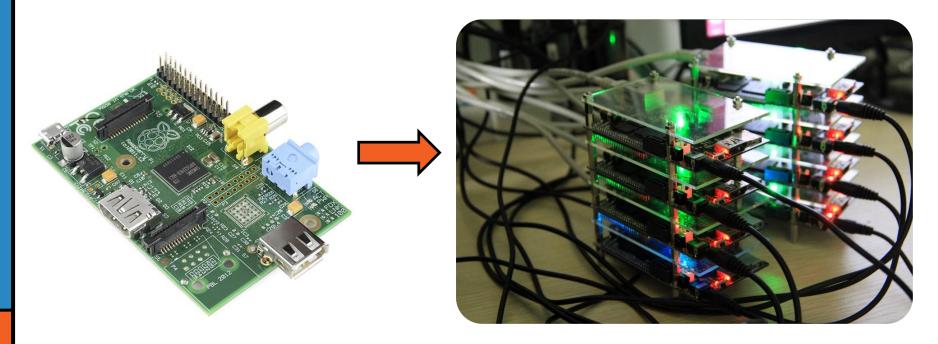

Turn Back The Clock, The Mainframe

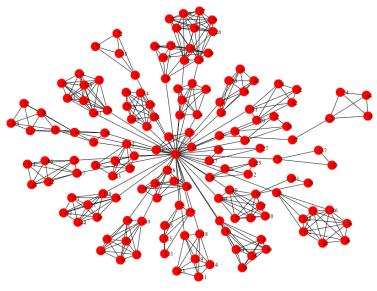

Distributed Computing

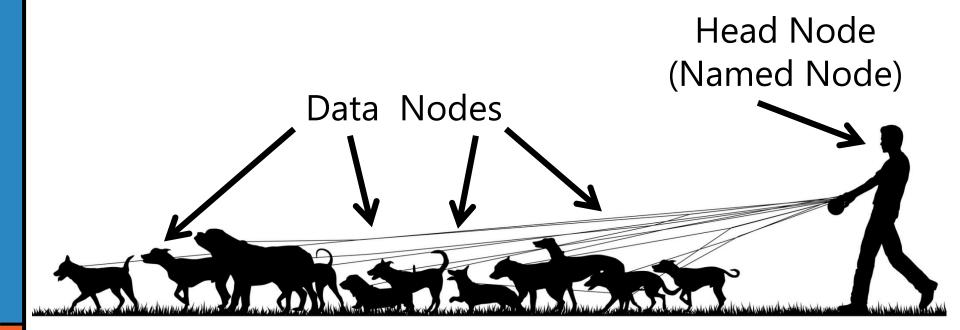

Cloud Computing

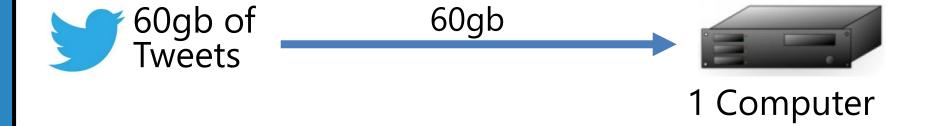

If dogs were servers...

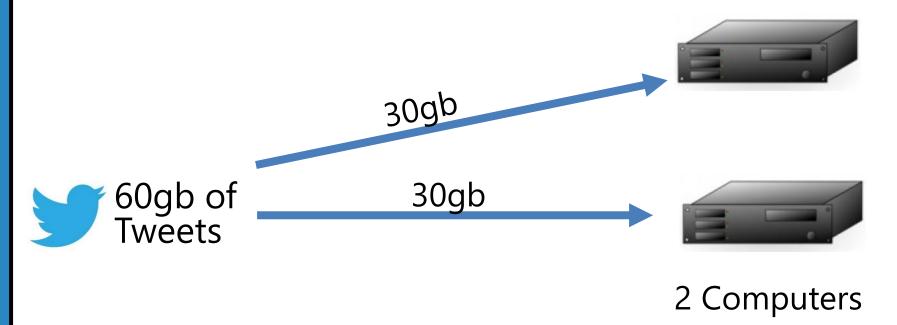

HDFS & MapReduce

Processing: 30 hours

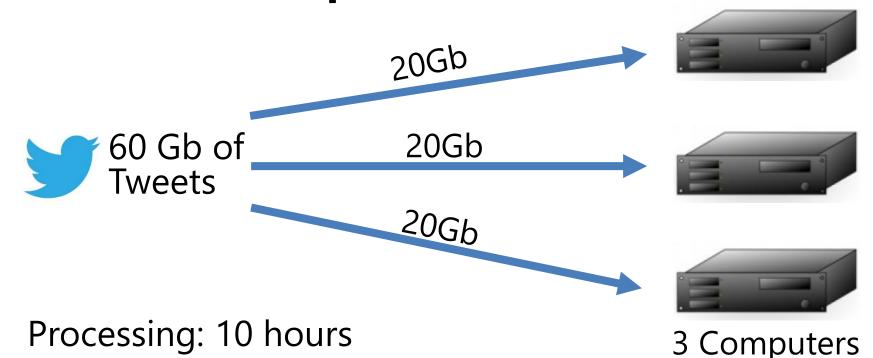

HDFS & MapReduce

Processing: 15 hours

HDFS & MapReduce

datascriencedojo unleash the data scientist in you

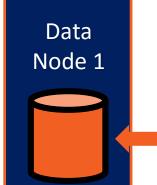

Most Cases, Linear Scaling Of Processing Power

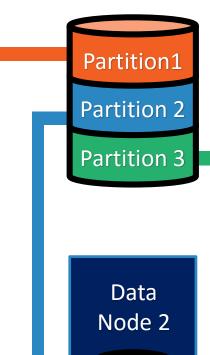

Number of Computers	Processing Time (hours)
1	30
2	15
3	10
4	7.5
5	6
6	5
7	4.26
8	3.75
9	3.33

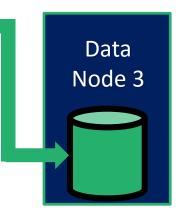

HDFS

HDFS Partitioning

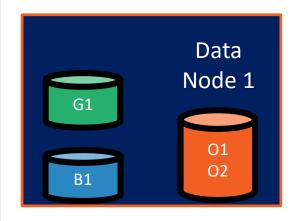

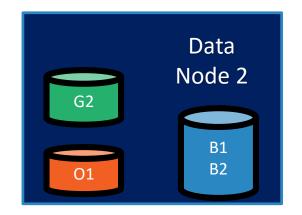

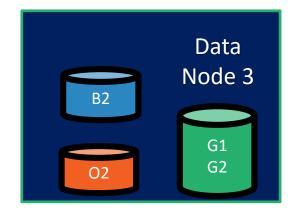

HDFS Redundancy

Limitations with MapReduce

- ~70 lines of code to do anything
- Slow
- Troubleshooting multiple computers
- Good devs are scarce
- Expensive certifications

```
org.apache.hadoop.examples;
import java.io.IOException;
import java.util.StringTokenizer;
       org.apache.hadoop.conf.Configuration;
       org.apache.hadoop.fs.Path;
       org.apache.hadoop.io.IntWritable;
       org.apache.hadoop.io.Text;
       org.apache.hadoop.mapreduce.Job;
       org.apache.hadoop.mapreduce.Mapper;
       org.apache.hadoop.mapreduce.Reducer;
       org.apache.hadoop.mapreduce.lib.input.FileInputFormat;
import org.apache.hadoop.mapreduce.lib.output.FileOutputFormat;
import org.apache.hadoop.util.GenericOptionsParser;
public class WordCount {
  public static class TokenizerMapper
       extends Mapper<Object, Text, Text, IntWritable>{
    private final static IntWritable one = new IntWritable(1);
    private Text word = new Text();
    public void map(Object key, Text value, Context context
                    ) throws IOException, InterruptedException {
      StringTokenizer itr = new StringTokenizer(value.toString());
      while (itr.hasMoreTokens()) {
        word.set(itr.nextToken());
        context.write(word, one);
```

Ambari: Cluster provisioning, management, and monitoring

Avro (Microsoft .NET Library for Avro): Data serialization for the Microsoft .NET environment

HBase: Non-relational database for very large tables

HDFS: Hadoop Distributed File System

Hive: SQL-like querying

Mahout: Machine learning

MapReduce and YARN: Distributed processing and resource management

Oozie: Workflow management

Pig: Simpler scripting for MapReduce transformations

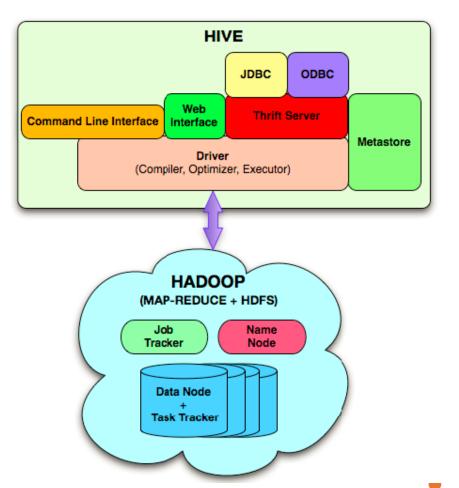

Sqoop: Data import and export

STORM Storm: Real-time processing of fast, large data streams

Zookeeper: Coordinates processes in distributed systems

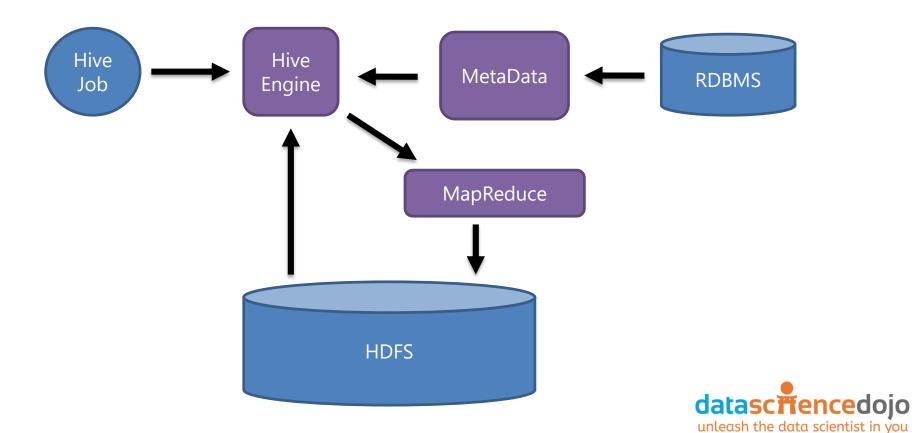

Hive Jobs

HiveQL Statement Translation & MapReduce Job

Hive Architecture

Unstructured Data

Structured Data

Semi Structured Data

Self Describing Flat Files

- XML
- JSON
- CSV
- TSV

```

Why Hive?

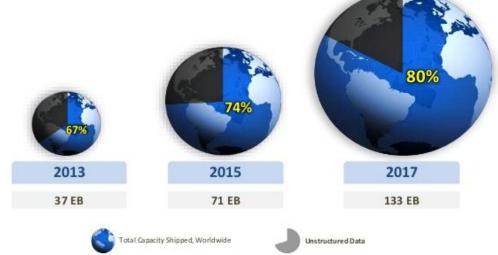

- SQL spoken here (HiveQL)
- ODBC driver
- BI Integration
- Supports only Structured Data

Limitations

Structured vs. Unstructured Data Growth

Azure Blob Storage

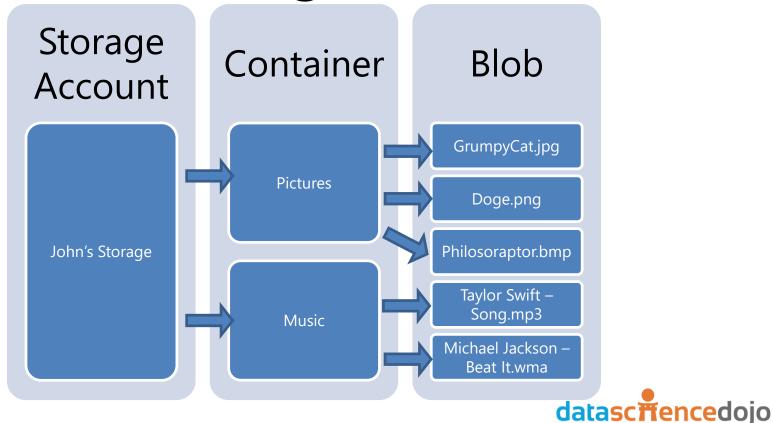

Blob Storage

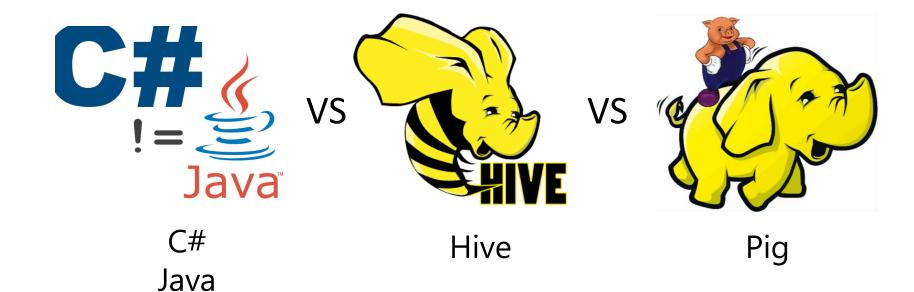

Azure Blob Storage

unleash the data scientist in you

When to Use Each

MapReduce

MapReduce, via Playing Cards

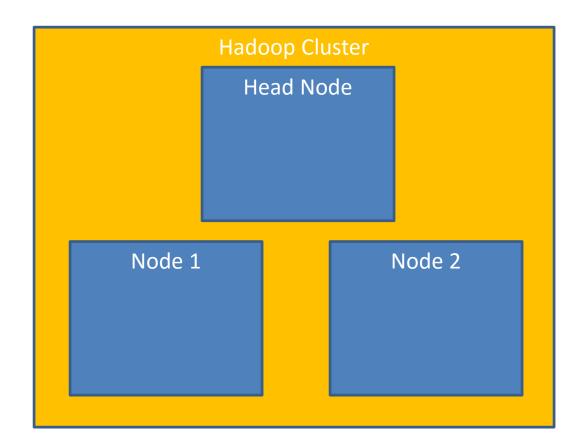

Let's count the number of spades, clubs, hearts, and diamonds in a stack of cards, the way map reduce would.

- Each card represents a row of data
- Each suite represents an attribute of the data

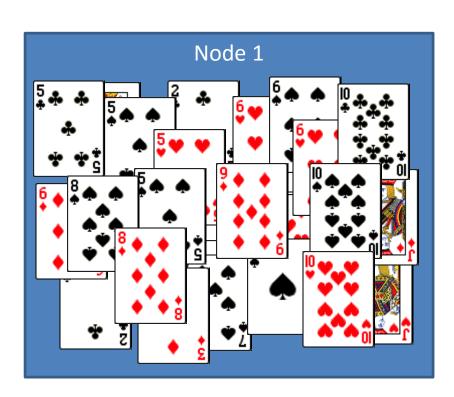

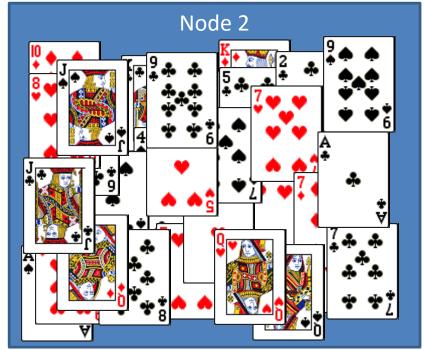

Using a 2 Data Node Cluster

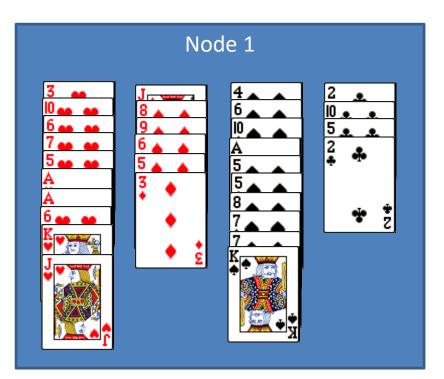

Mapping: Each Node's HDFS

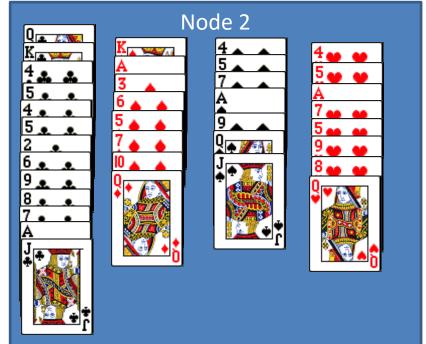

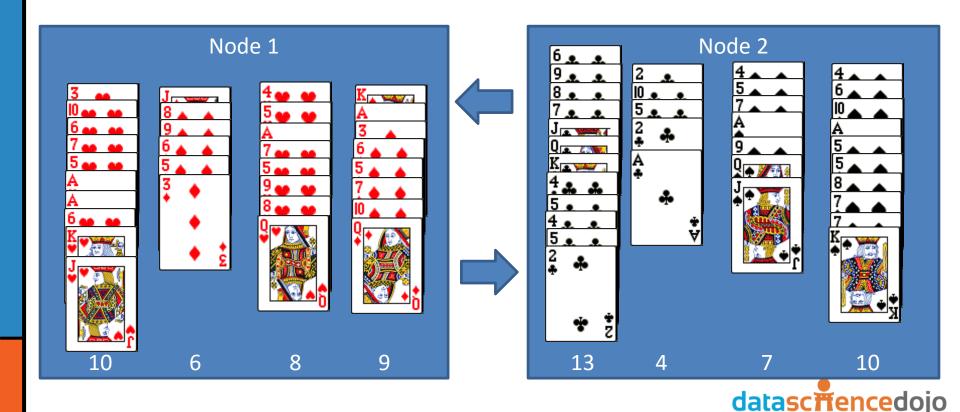

Mapping: Node Sorting

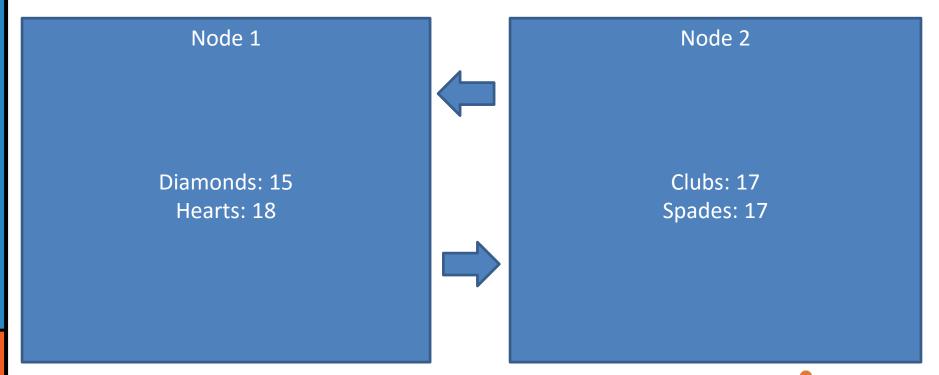

Mapping: Node Shuffle, Data Transfer

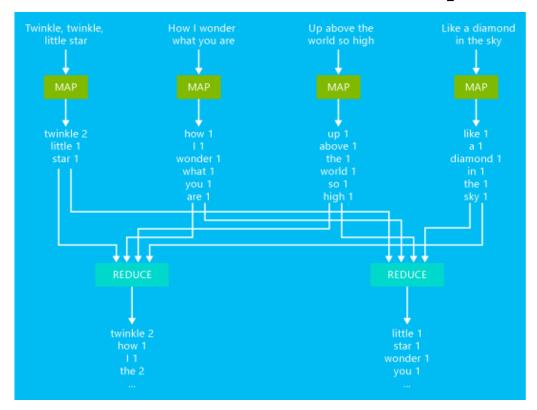

unleash the data scientist in you

Mapping: Node Shuffle, Data Transfer

Word Count, via MapReduce()

Databases
